

FOR IMMEDIATE RELEASE

1898 & Co. Now Offering Trimble Unity Construct Software for Digital Project Delivery as Part of Trimble Partner Network

KANSAS CITY, Missouri — [1898 & Co.](#), part of Burns & McDonnell, is now offering [Trimble Unity Construct™](#), powered by e-Builder. Trimble Unity Construct is an advanced digital construction management system that helps asset owners deliver projects with greater efficiency and less risk. The new offering represents a significant expansion of 1898 & Co. service offerings tailored to assist utilities and other industrial clients in managing major [capital investment programs](#).

As a member of the [Trimble Partner Network](#), 1898 & Co. will deliver, configure and implement the Trimble Unity Construct digital project delivery and capital program management software solution. The Trimble Partner Network is a global community of technology service providers and consultants that drive digital transformation and optimized [asset lifecycle management](#) for customers across government, transportation, airports, utilities and commercial market segments.

The collaboration with Trimble builds on 1898 & Co.'s longstanding work as a [Cityworks](#) services partner delivering Trimble's enterprise asset management solution for state and local government jurisdictions, public works departments, airports and utilities.

Trimble Unity Construct gives asset owners more control over every phase of capital projects. The software enables centralized, real-time data and digital workflows with functionalities ranging from capital planning, funding allocation and bidding to project, schedule and cost management.

“This is a major advance in our offerings to utilities and other clients that are launching major capital investment programs,” said Bill Norris, Senior Solutions Consultant, 1898 & Co. “Trimble Unity Construct is a powerful system that does a lot without the need to bring onboard any extra technical management support because the software is cloud-based and easy to configure, with rapid scaling and deployment. It's a solution that provides end-to-end data visibility and minimizes risk in every phase of a capital improvement cycle, from project planning to the operational handoff.”
