

FOR IMMEDIATE RELEASE**Burns & McDonnell Maintains Key No. 1 Spots and Strong Standing in *ENR* 2022 Sourcebook Rankings**

KANSAS CITY, Missouri — Continued support of critical infrastructure and strong economic growth helped [Burns & McDonnell](#) achieve a strong standing in the 2022 [Engineering News-Record \(ENR\) magazine](#) annual rankings of consulting engineering services.

The 100% employee-owned, engineering, construction and architecture firm maintained its No. 1 ranking in the Power and Transmission & Distribution categories for the seventh consecutive year. In total, Burns & McDonnell ranked in the top 10 in 20 of this year's *ENR* Top Design Firms Sourcebook sectors, including No. 2 in Telecommunications, No. 3 in Data Centers and No. 6 in Solar.

"The development of critical infrastructure has been a primary business of Burns & McDonnell for more than 120 years," says Ray Kowalik, chairman and CEO of Burns & McDonnell. "While infrastructure needs continually evolve, we are seeing incredible growth from three key areas: the push toward decarbonization, logistics and supply chain alterations; and the transformation to the digital world."

The Investment and Jobs Act (IIJA) touches most of markets served by Burns & McDonnell, adding even more to the firm's growth. Kowalik said the IIJA provides a framework for the firm's industries to continue to boom.

Burns & McDonnell ranks No. 8 overall among *ENR*'s Top 500 Design Firms, announced in April. Based on engineering and architectural design revenue earned in the prior fiscal year, the annual survey of the 500 largest U.S.-based design firms serves as a preview of the publication's comprehensive sourcebook rankings.

In construction rankings released by *ENR* earlier this year, Burns & McDonnell is No. 6 among Design-Build firms and No. 13 among Program Management firms.
