

FOR IMMEDIATE RELEASE**Burns & McDonnell Expands Its Construction Group in the UK**

BIRMINGHAM, England — Engineering and construction firm [Burns & McDonnell](#) is expanding its construction presence in the U.K. through the creation of a dedicated [Construction Group](#) to serve the U.K. market. This builds upon the existing construction services being provided to National Grid.

The expansion will result in the doubling of the size of the Construction Group in 2023.

Whilst continuing to offer high-quality EPC services, the benefit of the newly formed, dedicated Construction Group in the U.K. sets the stage to focus on successful growth of multiple services across the U.K. Nick Busby is transitioning from his role as U.K. Operations Director to lead the Construction Group as Director of Construction Operations, further empowering the fully integrated inception-to-completion services of Burns & McDonnell.

Nick Busby, Director of Construction Operations at Burns & McDonnell U.K. said:

“I’m thrilled to be leading the U.K. Construction Group, which is the result of the success and growth of Burns & McDonnell in the U.K. Clients can expect business as usual, but with a more formalised structure that enables us to align with the global business.”

“Having a fully integrated engineering and construction team working together with the rest of the U.K. business and sharing the same mission at every stage underpins the successful execution of our EPC projects and the Burns & McDonnell operating model.”

The Construction Group provides project management, safety, quality, estimating, procurement, planning, cost control and construction management support for EPC projects. Clients will continue to benefit from consolidated programmes, increased savings and enhanced project quality and delivery.

Jonathan Chapman, Managing Director at Burns & McDonnell U.K. said:

“Our U.K. business has grown rapidly since launching in 2017, and we need to adapt to accommodate this growth, whilst providing full-service solutions that address our clients’ engineering and construction challenges. The Construction Group’s increased presence marks a milestone in our growth. I’m excited about the new business it will generate and look forward to continuing my support of Nick in his new role as he leads his team toward a dynamic future.”

About Burns & McDonnell

Burns & McDonnell is a private, employee-owned engineering, design and construction firm with 10,000 professionals located in offices throughout the world. We strive to create amazing success for our clients and amazing careers for our employees.

We develop solutions through creating passionate partnerships, placing client service front and centre, understanding clients' needs, and striving to make them successful. Our employee ownership culture means that our success is closely aligned to our clients' success. We are bold in how we develop solutions and challenge the norm, drawing from the whole company to find answers to some of the toughest questions. We work on some of the world's most crucial infrastructure projects, delivering completely integrated service from concept to completion.

In 2017, Burns & McDonnell opened the U.K. office in [Birmingham](#). With more than 120 years of experience designing and building infrastructure throughout the world, Burns & McDonnell is now taking forward a long-term investment plan in the U.K.

With the U.K. energy market undergoing a transformation, our focus is on providing a differentiated service across technical consultancy, engineering services and project delivery as the U.K. adapts to a low carbon future underpinned by smart technologies.
